

Surender Singh

AI & Data Science Engineer | Machine Learning | Computer Vision | NLP | Full-Stack AI
surenderchoudhary07072004@gmail.com | github.com/Surender707 | linkedin.com/in/surender-choudhary-2a2b46293

EDUCATION

B.Tech – Artificial Intelligence & Data Science | MITRC, Alwar, Rajasthan | 2023–2027 | CGPA: 7.58

TECHNICAL SKILLS

Languages: Python (Expert), JavaScript, C++, Java, SQL **ML/DL:** PyTorch, TensorFlow, scikit-learn, LSTM, CNN, Gradient Boosting
Computer Vision: YOLOv8, OpenCV, MediaPipe **NLP:** HuggingFace Transformers, T5, LSTM+Attention, Text Summarization
Full-Stack: Flask, React.js, Node.js, MongoDB, REST API, JWT **MLOps:** Docker, Git, GitHub **GenAI:** LLM, RAG, Agentic AI, Prompt Engineering

PROFESSIONAL EXPERIENCE

Data Science Virtual Intern – CodSoft April 2026

- Built ML pipelines (scikit-learn, Pandas, NumPy) on real-world datasets — classification, regression, EDA, and Matplotlib/Seaborn visualizations for stakeholder reporting.

Full Stack Web Development Intern – WSA (Web Stack Academy) Mar–Apr 2026

- Developed a full-stack MERN app with RESTful APIs, JWT authentication, and React front-end connected to MongoDB — following SDLC practices throughout.

PROJECTS

TaskFlow | MERN, Node.js, MongoDB, Chart.js, REST API

- Intelligent full-stack productivity system with a rule-based ML intelligence engine for automated task prioritization and real-time Chart.js dashboards for behavioral insights.

PlayStore Pulse | Python, Flask, Gradient Boosting, React.js, scikit-learn

- Analytics platform on 10,000+ Play Store records; trained & deployed a Gradient Boosting rating predictor via Flask REST API — end-to-end ML from training to live API.

Emotion Classifier | YOLOv8, PyTorch, CNN, OpenCV

- Real-time facial emotion recognition — YOLOv8 face detection + custom CNN (PyTorch) classifying 7 emotions via live webcam at production-ready latency.

Hand Gesture Virtual Mouse | MediaPipe, OpenCV, PyAutoGUI

- Touchless HCI system mapping 21-point MediaPipe hand landmarks to full OS-level controls (click, drag, scroll, zoom) — eliminating physical input devices entirely.

Dual-Model Text Summarizer | HuggingFace T5, LSTM+Attention, PyTorch

- Comparative NLP tool with custom LSTM+Attention (trained from scratch) vs. fine-tuned T5 transformer for side-by-side abstractive summarization benchmarking.

CERTIFICATIONS & ACHIEVEMENTS

Tata GenAI Powered Data Analytics (Forage, 2026) | CodSoft Data Science Internship | ML & AI Foundations (Udemy) | Python Mastery: 100 Days, 100 Projects | Agentic AI Playbook

🏆 **1st Prize – College Hackathon:** Rapid prototyping, system design, and problem-solving under time constraints.
