TECHNICAL SKILLS

Languages

Python, JavaScript, C++, Java, SQL

ML / DL

PyTorch, TensorFlow, scikit-learn, LSTM, CNN, Gradient Boosting

Computer Vision

YOLOv8, OpenCV, MediaPipe

NLP

HuggingFace Transformers, T5, LSTM + Attention

Full-Stack

Flask, React.js, Node.js, MongoDB, REST API, JWT

MLOps

Docker, Git, GitHub

GenAI

LLM, RAG, Agentic AI, Prompt Engineering

EDUCATION

B.Tech, Artificial Intelligence & Data Science

Modern Institute of Technology and Research Center (MITRC), Alwar

2023 – 2027 (7th Semester)

CERTIFICATIONS

- Tata GenAI Powered Data Analytics — Forage (2026)
- CodSoft Data Science Internship Certificate
- ML & AI Foundations — Udemy
- Python Mastery: 100 Days, 100 Projects
- Agentic AI Playbook

PROFESSIONAL SUMMARY

Aspiring AI & Data Science Engineer with hands-on experience building end-to-end machine learning pipelines, computer vision systems, and full-stack web applications. Skilled in model development, evaluation, and deployment across classification, regression, and NLP tasks, with practical exposure to the MERN stack and REST API development.

PROFESSIONAL EXPERIENCE

Data Science Virtual Intern

Apr 2026 (4 weeks)

CodSoft

- Built end-to-end machine learning pipelines (scikit-learn, Pandas, NumPy) on real-world datasets covering classification, regression, and exploratory data analysis (EDA).
- Produced Matplotlib/Seaborn visualizations for stakeholder reporting; completed the internship with Wonderful Remarks.

Full Stack Web Development Intern

Mar – Apr 2026

WSA (Web Stack Academy)

- Developed a full-stack MERN application with RESTful APIs, JWT authentication, and a React front-end connected to MongoDB, following complete SDLC practices.
- Certificate ID: WMS125_006.

PROJECTS

TaskFlow | MERN, Node.js, MongoDB, Chart.js, REST API

- Built an intelligent full-stack productivity system with a rule-based ML engine for automated task prioritization and real-time Chart.js dashboards for behavioral analytics.

PlayStore Pulse | Python, Flask, Gradient Boosting, React.js, scikit-learn

- Built an analytics platform on 10,000+ Play Store records; trained and deployed a Gradient Boosting rating predictor (87.3% accuracy) via a Flask REST API in an end-to-end ML pipeline.

Dual-Model Text Summarizer | HuggingFace T5, LSTM + Attention, PyTorch, Flask

- Built a comparative NLP tool benchmarking a custom LSTM + Attention model (trained from scratch) against a fine-tuned T5 transformer, evaluated side-by-side with ROUGE-L scoring.

Emotion Classifier | PyTorch, YOLOv8, OpenCV, CNN

- Built a real-time 7-class emotion detection system via webcam at 24 FPS, combining YOLOv8 face detection with a custom CNN classifier and live confidence scoring.

Hand Gesture Virtual Mouse | Python, MediaPipe, OpenCV, PyAutoGUI

- Built a touchless computer control system translating hand movements into mouse actions (cursor, clicks, scroll, pinch-zoom, drag-and-drop) with ~8ms latency using Google MediaPipe.
