EDUCATION

B.Tech — Artificial Intelligence & Data Science

2023 — 2027

Modern Institute of Technology and Research Center (MITRC), Alwar, Rajasthan · 7th Semester

TECHNICAL SKILLS

Languages: Python (Expert), JavaScript, C++, Java, SQL
ML / DL: PyTorch, TensorFlow, scikit-learn, LSTM, CNN, Gradient Boosting
Computer Vision: YOLOv8, OpenCV, MediaPipe
NLP: HuggingFace Transformers, T5, LSTM + Attention
Full-Stack: Flask, React.js, Node.js, MongoDB, REST API, JWT
MLOps: Docker, Git, GitHub
GenAI: LLM, RAG, Agentic AI, Prompt Engineering

PROFESSIONAL EXPERIENCE

Data Science Virtual Intern — CodSoft

Apr 2026 (4 weeks)

- Built end-to-end ML pipelines (scikit-learn, Pandas, NumPy) on real-world datasets — classification, regression, EDA, and Matplotlib/Seaborn visualizations for stakeholder reporting. Completed with Wonderful Remarks.

Full Stack Web Development Intern — WSA (Web Stack Academy)

Mar — Apr 2026

- Developed a full-stack MERN application with RESTful APIs, JWT authentication, and React front-end connected to MongoDB, following complete SDLC practices. Certificate ID: WMS125_006.

PROJECTS

TaskFlow | MERN, Node.js, MongoDB, Chart.js, REST API

- Intelligent full-stack productivity system with a rule-based ML engine for automated task prioritization and real-time Chart.js dashboards for behavioral analytics.

PlayStore Pulse | Python, Flask, Gradient Boosting, React.js, scikit-learn

- Analytics platform on 10,000+ Play Store records; trained and deployed a Gradient Boosting rating predictor (87.3% accuracy) via Flask REST API — end-to-end ML pipeline.

Dual-Model Text Summarizer | HuggingFace T5, LSTM + Attention, PyTorch, Flask

- Comparative NLP tool benchmarking custom LSTM + Attention (trained from scratch) vs. fine-tuned T5 transformer for side-by-side abstractive summarization with ROUGE-L scoring.

Emotion Classifier | PyTorch, YOLOv8, OpenCV, CNN

- Real-time 7-class emotion detection via webcam at 24 FPS. YOLOv8 face detection + custom CNN classifier with live confidence scoring.

Hand Gesture Virtual Mouse | Python, MediaPipe, OpenCV, PyAutoGUI

- Touchless computer control translating hand movements into mouse actions — cursor, clicks, scroll, pinch-zoom, drag-and-drop with ~8ms latency via Google MediaPipe.

CERTIFICATIONS

- Tata GenAI Powered Data Analytics — Forage (2026)
- CodSoft Data Science Internship Certificate
- ML & AI Foundations — Udemy
- Python Mastery: 100 Days, 100 Projects
- Agentic AI Playbook
